Professional Summary

Dedicated Java developer with over 1.8 years of experience designing, implementing, and maintaining Java applications. Proficient in Java SE/EE, spring framework, and web technologies. Skilled in database design and management. Strong problem-solving abilities and a commitment to delivering high-quality software solutions. Proven track record of collaborating effectively in team environments to achieve project goals.

Technical Skills

Front-End : HTML and CSS , JavaScript

Back-End : Core Java, SpringBoot

Databases: MySQL

Experience

Mphasis limited

Jun 2022 – Jan 2024

Associate Software Engineer

Bangalore, India

Project: FedEx | PDSM - Package Data and Sort Management |

- Detect delays, inform L3 developer to check logs, and communicate necessary changes to the development team. Wait a day to confirm resolution before closing the case.
- Address data-related issues, scanning problems, and USG device issues with the GWS and miscct teams.
- Resolve IIIH/RIH allocation issues and manage shipment link overflow with a 10,000 depth limit, primarily due to allocation constraints.
- Manage server latency, restart servers if issues arise, and use advanced tools to diagnose persistent problems after a restart.

Project: Talent Resource Management System |Java, Spring Boot, Hibernate, Spring Security, PostgreSQL |

- The system's frontend transitioned from JSP to Angular, offering a more interactive and user-friendly interface.
- The backend migrated from traditional Java to Spring Boot, resulting in faster development cycles, improved performance, and enhanced security.
- Spring Boot's embedded server simplifies deployment, while its ecosystem supports functionalities like data access, messaging, and cloud integration.

Education

K.S.R College of Engineering

July 2018 – July 2022

B.E Computer Science and Engineering

Tamil Nadu, India

First Class with 7.91 CGPA

Certifications

- Software Engineer Intern certification by HackerRank.
- AWS Cloud Practitioner Essentials by AWS.
